

FACTS

Green room divider

LiveDivider is a green room divider. The room divider is used to divide the room while maintaining an open space. The metal frame and solid fixed base make the LiveDivider a beautiful addition to any space. The LiveDivider includes an integrated watering system that provides the right amount of water and nutrition for up to six weeks. This watering system requires no electricity supply, water pumps or water drainage. The frame includes six interchangeable plant cassettes on each side. The interchangeable plant cassettes can be easily adapted to the season or circumstances.

BENEFITS

- Divides spaces, maintaining an open feeling
- Improves air quality through oxygen production and fine dust absorption
- Increases productivity and creativity
- Vertical greenery requires little space
- Improves the living, learning and working environment
- Improves spatial acoustics

FEATURES

- Interchangeable plant cassettes
- Integrated watering system
- No electricity or pump required
- Water supply for four to six weeks
