

FACTS

LiveFeed is an NPK fertiliser and appropriate for the following products: manually water-filled LivePanel, LivePanel PACK, LivePicture, LivePicture GO and LiveDivider. LiveFeed consists of liquid plant nutrition, keeping plants strong and healthy with essential nutrients and a rich mixture of trace minerals. LiveFeed ensures plants grow and bloom beautifully. NPK stands for the nutrient elements in the fertiliser: Nitrogen (N), Phosphorus (P) and Potassium (K). Nitrogen, phosphorus and potassium are essential nutrients for plants. Nitrogen is required for plant growth. Phosphorus ensures the development of roots, buds and flowers. Potassium adds strength, resilience and transfers water and carbohydrates.

HARD WATER

N-P2O5-K2O: 15.5%		Trace min.	Content
Fertiliser	% / litre		% / litre
N Total	5.98	Fe(DTPA)	0.633
NO3-	3.77	Mn(EDTA)	0.288
NH4+	2.21	Zn(EDTA)	0.184
P2O5	2.2	Bo	0.134
K2O	7.28	Cu(EDTA)	0.018
		Mo	0.047

SOFT WATER

N-P2O5-K2O: 15.5%		Trace min.	Content
Fertiliser	% / litre		% / litre
N Total	5.98	Fe(DTPA)	0.633
NO3-	3.77	Mn(EDTA)	0.288
NH4+	2.21	Zn(EDTA)	0.184
P2O5	2.2	Bo	0.134
K2O	7.28	Cu(EDTA)	0.018
		Mo	0.047

ADDITIONAL INFORMATION

VARIETIES

LiveFeed is available for hard and soft water.

LiveFeed – Hard Water is an NPK fertiliser solution, developed for water with average CaCO₃ hardness of: 100-350 mg/l, dH: 5.6-19.7, fH: 10-35, eH: 6.9-24.5.

LiveFeed – Soft Water is an NPK fertiliser solution, developed for water with average CaCO₃ hardness of: 0-150 mg/l, dH: 0-8.4, fH: 0-15, eH: 0-10.5.

HOW TO USE

0.5 ml / 1 litre water

WARNINGS

This nutrient solution has a low pH value and a high salt concentration. LiveFeed in concentrated form is aggressive to materials and skin. Do not mix with fertilisers containing calcium (Ca). Do not combine with rainwater or demineralised water.
