

FACTS

A plant picture for your home

LivePicture GO offers a playful way of adding vertical greenery to your living, learning or working environment. Even if you do not have green fingers, the plants stay healthy and beautiful with little effort required. The LivePicture GO empty indicator shows when the water tank needs to be filled. The tank holds enough to water the plants for two to four weeks. The capillary technology of the plant cassette ensures the plants always have the right amount of water. The slots of the removable plant cassette are filled with plants based on your own preferences and tastes. LivePicture GO is highly versatile; it can be used indoor and outdoor, in a single or a modular set-up. Create a playful collage using multiple LivePicture GO units. Easily mount the living picture using the two screws and installation template provided.

BENEFITS

- Easy plant maintenance
- Improves air quality through oxygen production and fine dust absorption
- Increases productivity and creativity
- Vertical greenery requires little space
- Improves the living, learning and working environment
- Enhances the ambience
- Improves spatial acoustics

FEATURES

- Fast and easy installation
- Integrated watering system
- No electricity or pump required
- Water tank for two to four weeks
- Includes full and empty indicators
- Interchangeable plant cassettes
- Lightweight
