

LIVEPICTURE GO

## A plant picture for your home

LivePicture GO offers a playful way to add vertical greenery to your living, learning, or working environment. Even if you're not green-fingered, the plants stay healthy and beautiful without much effort. The LivePicture GO 'empty' gauge shows when the water tank needs to be filled. The tank holds enough to water the plants for two to four weeks. The capillary technology of the plant cassette ensures the plants always get the right amount of water. The slots in the removable plant cassette can be filled with plants in line with your own preferences and tastes. LivePicture GO is highly versatile; it can be used indoors and outdoors, as a single unit or in a modular setup. Creating a playful collage is easy using multiple LivePicture GO units. This living picture is simple to install using the two screws and installation template provided.

LivePicture GO Bamboo, made of sustainable bamboo fibers, is the latest addition to our range. Bamboo is a natural and sustainable material with a low environmental impact. Bamboo is biodegradable and 100% recyclable. This natural and sustainable material ensures that all LivePicture GO units are unique. It's not just the plants that make LivePicture GO Bamboo the perfect green solution; it's the frame too.

### BENEFITS

- Vertical greenery takes up less space
- Improves the indoor climate and air quality
- Helps improve focus, productivity, and general well-being
- Improves the acoustics in a room
- Sound-dampening effects
- Lowers stress levels

| School | Kitchen | Hospitality | Waiting area |

*\*LivePicture GO White can be used outdoors*

### FEATURES

- Water tank lasting 4-6 weeks, with 'full' and 'empty' gauge
- No electricity or pump required
- Fully recyclable
- Interchangeable plant cassettes
- Lightweight
- Integrated watering system
- Quick and easy installation
- For indoor and outdoor use\*
- 100% recyclable

### TECHNICAL INFORMATION

#### DIMENSIONS (L x H x D)

51,6 x 51,6 x 11,2 cm.

#### COLORS

White, Bamboo Natural and Bamboo Black.

#### MATERIAL

Frame: Bamboo Bioblend or ASA.

Plant cassette: EPP (Expanded Polypropylene).

#### WEIGHT

2.7 kg excluding water and plants.

approx. 5 kg including water and plants.

#### PLANT CASSETTE

The interchangeable plant cassette has two slots that provide space for six size 9 (P9) plant pots in total (three plants per slot).

#### MAINTENANCE

Clean the frame using a soft microfiber cloth and mild soap. Do not use abrasive cleaning agents. Pruning dead or unhealthy plant matter will encourage new growth, resulting in fuller and more compact plants, and helps them retain their green and fresh appearance.

#### WATER SUPPLY

Two-liter water tank, filled manually. The water reservoir is fitted with an 'empty' and 'full' gauge. No electricity, drainage, or water supply is required.

#### INSTALLATION

Installation template, instructions, and assembly material included.

#### PLANT SUGGESTIONS

Houseplants, herbs, succulent plants, and grasses.
